

BONDING METALS

Bond Metals to Metals, Plastics, Composites, and Dissimilar Substrates... *without primers!*

Plexus Metal Bonder™ Adhesives:

- Eliminate bolts, screws, rivets, and other mechanical fasteners
- Eliminate predrilling operations and speed assembly
- Dramatically reduce repetitive stress injuries and factory noise levels
- Eliminate welding and unsightly scorching or dimpling of thin panels
- Are available in long open-time versions for large assemblies
- Exhibit high-temperature resistance for post-bake operations
- Produce stronger assemblies by distributing stresses over large bond areas
- Prevent leaks that can occur when fastener holes expand due to vibration
- Produce smooth, flawless surfaces for improved aesthetics
- Absorb vibration and resist impact, fatigue, and temperature extremes/cycling
